

FS-X4 CNC Valve Head & Seat Turning Machine

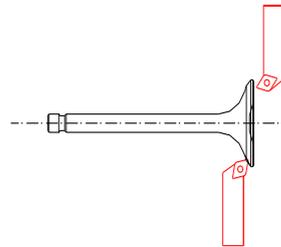

Key Points

- A Fast, Precise and Reliable Machine
- Cycle Time: 5 to 7 seconds
- Use by major valve manufacturers in Europe, USA and Asia
- Easy to set up and changeover
- Easy to link into fully automatic production lines

Valve Size Range (as standard)

- Head \varnothing : 20 – 50 mm
- Stem \varnothing : 5 – 10 mm
- Overall length: 90 – 160 mm

Key Features:

- Two tools with standard indexable inserts can work simultaneously.
- Collet spindle controlled driven by a servo-motor with fast acceleration and deceleration and variable speed range up to 4500 rpm.
- Floating or rigid underhead support.
- In-process head thickness compensation
- Siemens 5-axis CNC control with 10" colour touch-screen interface.
- User-friendly interface for program selection, tool wear compensation etc.
- Modem / Internet link for remote diagnostics and programming.
- Rugged, fast pneumatically actuated loading system.
- Integrated coolant system and swarf conveyor.

Capability

- Datum to Face: +/- 0.050 mm
- Run-out (TIR) < 0.1 mm
